Protect your PCDART Data

FREE!

DART Safe

is now available at *no charge* for producers.

" *December 31 started as any other day on the farm. Little did I know that my computer was starting to celebrate the New Year a little early! I never did get all of the facts associated with the accident of that day (no blood alcohol test was taken, no skid marks were found), but in the corner of my office lay a drunken, crashed, non-functioning computer barely alive.*

The operating system never would boot. Error, Error, Error!!!! We rushed it to the Computer Surgeon Care unit. After 4 hours, we had the computer going again! But it was not all good news. ALL of the PCDART data was lost!!! What would I do, what would I do!?! It must have been a GOD thing, because when DRMS started the DART Safe program, something inside me said YES, I need that protection.

With DART Safe I was able to leave the Computer Hospital with ALL of my PCDART data restored!!! My other programs weren't that easy to restore. The DHIA tech was at the farm one week later and the PCDART program worked great for her but I was still trying to get my Milking Machine Program to work. Two weeks later, I was still making calls and downloading updates, but not PCDART. It was still working great!

I felt vulnerable, violated and ashamed that I had not done a better job of having all my programs backed up like I did with DART Safe. PocketDairy was also very helpful to me after the tragedy. I was able to look up information on each cow to make sure all of the cows were taken care of the way they needed to be.

So PLEASE take the time to sign up for DART Safe before it's too late, it's a FIG LEAF in the Garden of Life! "
