Internet is not required. Look up cow data anywhere.

Used by herds ranging in size from 13 to 13,000 cows.

Affordable monthly fee with no large up-front purchase.

Wirelessly sync unlimited phones, tablets or media devices at no extra charge. Have a device for yourself, your herdsperson and any other critical employees.

Enter vet check day data cow side on one screen with the Vet Check Maxx feature for tablets.

Auto back-ups and updates.

RFID wanding compatible. Audio features make wanding even faster!

Cow side entry eliminates the need for clipboard and paperwork.

Customizable cow pages.

Create a worklist as you see animals needing attention.

Group Check allows for quick verification of cows in specific pens.

A companion app to PCDART. Import PCDART Reports.

Customize reports to your needs.

Color code your inputs and reports by category, order or any other way that improves efficiency.

Simplify calving data! Enter calving, transponder number and group change on the same screen.

Assign animals to protocols immediately, reducing forgotten to-do items.

Mark chores complete as you go. Save that second step.

Assign health conditions and treatments as you and your employees walk the herd.

Enter new animals as they come off the trailer, reducing confusion.

Display cows and heifers separately when desired.

Load multiple herds on the same device with Consultant version. Works for units with multiple herd codes, too!

Import/Export BullList to help resolve incorrect service sire information.

Share customizable Health Remarks with PCDART.

Work with a network or on a standalone device.

Available in English, Spanish, and Czech with easy transition back and forth.
