

DART

MYTH

Dart Has Limited Interfaces with Other Systems

Nearly 30 System Interfaces Connected to Dart

Dart integrates with parlor, rotary, and robot milking systems, heat monitoring, feed management, and hoof trimming software – enabling direct data flow that keeps herd records aligned, reduces duplicate entry, and supports informed herd decisions.

Feed Systems

Ration and feed management data

- Amelcor - EZ Feed
- Supervisor Systems - Feed Supervisor
- Topcon - Feed App
- Topcon - TMR Tracker

Milking

Parlor and individual milking data

- afimilk AfiFarm
- AIC
- BECO
- Boumatic SmartDairy
- DairyMaster
- DeLaval Delpro
- GEA DairyPlan
- Jantec Systems
- SenseHub

Hoof Trimming

Mobility and hoof health records

- Hoof Supervisor
- AccuTrim

Robotic

Automated milking production and activity

- DeLaval Delpro
- Galaxy Astria
- GEA DairyPlan
- Lely T4C or Horizon

Heat Monitoring

Reproductive, activity and breeding signals

- afimilk AfiFarm
- Boumatic RealTime Activity
- CowManager
- DairyMaster MooMonitor+
- DeLaval Delpro
- ENGS Track-A-Cow
- NEDAP CowWatch and NEDAPNow
- SenseHub
- Semex ai24

Streamlined data flow keeps your herd records accurate, aligned, and easier to use. To learn about additional interfaces currently in development, contact DRMS.

Dart: There are Myths.
Producers Prove the Reality.
